

Basin Uranium Announces Permitting for Drill Program at Chord

Vancouver, British Columbia--(Newsfile Corp. - April 30, 2024) - **BASIN URANIUM CORP. (CSE: NCLR) (CNSX: NCLR.CN)** ("**Basin Uranium**" or the "**Company**") is pleased to provide an update on permitting for the Company's flagship Chord uranium project in South Dakota. A permit application was submitted in March, which would allow for the drilling of up to 50 holes totaling up to 35,000 feet. The drill program will focus on delineating the southern extension of known mineralization from the October Jinx mineralized body within the recently-acquired 640 acre state section (Section 36-7S-2E) which was announced on November 22, 2023 ([news release](#)). The Company and its consultants are in active dialogue with the South Dakota Department of Agriculture and Natural Resources, stakeholders and partners.

"We designed the upcoming drill program and corresponding permit application to focus on the delineation of potentially ore grade mineralization, of the October Jinx mineralized zone to the south, where modelling by our consultants demonstrate the constraint due to the historical property boundary," commented Mike Blady, CEO of Basin Uranium. "The resource modelling exercise, which we anticipate the results of in the coming weeks, has highlighted the potential for significant expansion of potentially ISR-amendable uranium mineralization."

About Basin Uranium Corp.

Basin Uranium is a Canadian junior exploration company focused on mineral exploration and development in the green energy sector. The company has three advanced-stage uranium projects located in the United States, namely the Chord project in South Dakota, the South Pass project in Wyoming, and the Wray Mesa project in Utah.
